Systems Engineering student at Universidad del Valle with a solid grasp of JavaScript, HTML, and CSS. I am eager to gain practical experience and have a proven track record of quickly learning new technologies. My skills extend to UX, design, and other user experience-related skills, including proficiency with design tools such as Figma, also can work with collaborative tools like Atlassian, Jira, and Git. I am proficient in English (B2). I am looking for an opportunity to apply my skills and knowledge in a challenging and dynamic environment.

Experience

Freelance Website Designer and Developer at IntelDocs (November 2024 - Present)

- Design the IntelDocs website, a document management platform, using Figma, ensuring a user-friendly and intuitive interface.
- Design the content model and structure of the website, ensuring that the information is organized and presented in a clear and logical way for future modifications.
- Develop the IntelDocs website, using HTML, CSS, JavaScript and Astro, ensuring a responsive and user friendly design.
- Implement reactive components and animations using embeded React components, improving the user experience and engagement.
- Collaborate with the development team to ensure the design is implemented correctly and meets the requirements and expectations of the client.
- Create the page using the server-side rendering framework Astro, ensuring fast loading times a smooth user experience and SEO optimization.
- Integrate the website with the CMS contentful, allowing the client to easily update and manage the content of the website without the need for technical knowledge.
- Create render safe components to ensure the website structure is not compromised by the client's changes, ensuring the website's integrity and consistency.

Skills and tools: Figma, HTML, CSS, JavaScript, Astro, React, Contentful, Design, User Experience, User Interface, Responsive Design, SEO Optimization, Collaboration, Communication, Problem Solving, Creativity, Time Management, Attention to Detail, Client Management.

Software Engineer at Aux at Universidad del Valle (August 2022 - Present)

- Developed and maintained automatic monthly reports using Google Sheets and Google Apps Script, reducing the time spent on manual reporting by at least 80%.
- Created custom templates for the reports, allowing for easy customization and adaptation to different departments and needs.
- Improved the accuracy and reliability of the reports by implementing data validation and error handling, ensuring the quality of the data and the reports.
- Lead the project from conception to implementation, coordinating with stakeholders, gathering requirements, and delivering the final product on time and within budget.

Skills and tools: Google Sheets, Google Apps Script, Automation, Data Analysis, Data Visualization, Project Management, Communication, Problem Solving, Requirements Gathering, User-Centered Design.

- Developed user interfaces tailored to client requirements, ensuring a user-friendly and intuitive experience.
- Collaborated with a team focused on rigorous testing to minimize errors and ensure a high-quality product.
- Followed agile methodologies to deliver projects on time and within budget, ensuring client satisfaction.
- Participate and collaborate in agile ceremonies, such as sprint planning, daily stand-ups, and retrospectives, ensuring alignment and communication within the team.

Skills and tools: HTML, CSS, JavaScript, Agile Software Development, User Interface Design, User Experience, Collaboration, Communication, Problem Solving, Creativity, Time Management, Attention to Detail, Client Management.

Soft Skills

Autonomy, Teamwork, Communication, Problem Solving, Creativity, Time Management, Attention to Detail, Client Management, Leadership, Adaptability, Emotional Intelligence, Critical Thinking, Decision Making, Conflict Resolution, Negotiation, Stress Management, Empathy, Active Listening, Persuasion

Education

Bachelor's Degree in Systems Engineering at Universidad del Valle (June 2016 - December 2021)

Academic Experience

Artificial Intelligence
- Breast Cancer Prediction
- Labyrinth Solver

DevOps
- GitHub Actions Workshop

Software Development
- Sweet Pet Shop
- Visual Novel (Figma)

Complexity and Optimization
- Thermal Units Optimization
- Electric Station

API Development
- Students API

UX Design
- Red Wheels (Figma)
- Eco Buddy
